

# Telephone Authorization

Dear Patient:

We will notify you of all your laboratory test including x-ray, blood work, Pap test, etc. This process takes approximately two weeks.

Results are available on our Automated Result Line. There will be a confidential personal message left by the physician or staff. We ask that you pick up a card with the number on it and keep it for reference.

Please wait two weeks from you test or office visit before you contact our office if you have not received your results, unless specifically instructed to call sooner by the doctor.
